AprivaPay™

Sell Anything, Anywhere with AprivaPay

TAXI

How businesses accept mobile payments.

A POS

AprivaPay

AprivaPay makes credit card transactions as easy as the push of a cell phone button and was created for business owners who require the ability to accept credit card payments in the shop or out in the field. This technology is a powerful cell phone version of the software used in traditional credit card terminals. Your business customers can perform all the same functions including credit card transactions and authorization right from their cell phones. Utilized in conjunction with a portable printer and/or credit card reader, they have a very sophisticated, highly mobile and less-expensive point of sale product.

FEATURES AND OPTIONS

SOFTWARE-BASED

AprivaPay is software that is easily downloaded to a cell phone. The software turns a cell phone into a mini credit card transaction terminal that can perform all the same functions as a traditional wireless terminal.

BROWSER-BASED

Perform credit card transactions by accessing our mobile terminal website with a cell phone. On the site, enter a username and password and input the credit card information. No software downloading required, only a phone with browser capabilities.

LOW-COST ALTERNATIVE

Provide your business customers a great entry-level solution. Use an existing cell phone and add an optional portable printer and/or credit card reader for a fraction of the cost of a traditional wireless terminal.

ENCRYPTION, SECURITY AND PA-DSS

AprivaPay's encryption and security have been independently verified to meet or exceed all leading standards, including PA-DSS.

CUSTOMER SERVICE/TECHNICAL SUPPORT

Apriva provides around-the-clock backup and technical support. We're available 24/7 to give your customers the support they need to be successful.

CONVENIENT

With AprivaPay, no new cell phone is required. Just a new way of thinking about how mobile businesses perform credit card transactions.

ABOUT APRIVA

Apriva leads the way in wireless payment processing and secure mobile communications. Our customers benefit from fully-managed, end-to-end security solutions that incorporate hardware, software and network infrastructure, and management tools. That means businesses of all sizes and government agencies use Apriva technology to communicate with confidence — using the networks and devices they favor.
